

Estimates (water collected vs. rainfall) :	
Enter rainfall amount (inches):	0.91
Volume of water collected on this roof for this amount of rain (gallons) =	3,177
Water saved in tank from this amount of rain (gallons) =	3,177
Proportion this amount of rain contributes to full tank capacity =	9%
Overflow (gallons) =	0
Change in water level in each tank for this amount of rain (inches) =	6.70
No. of days this rainfall will supply =	32
